Personal info

ahmed.salama.abouzied@gmail.com
Alexandria, Egypt
(20) 1274557735

Front-End Developer with a proven ability to collaborate effectively with senior developers while spending extra time to be mentored. Enjoy working closely with team members to ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary. With a passion for both personal growth and for software development, I attended a 1000+ hour coding Bootcamp to learn new languages while sharpening existing skills. Ready to apply my passion for coding to a talented engineering team to develop quality solutions,

WORK EXPERIENCE

freelancer - frontend developer

Alexandria egypt

- Implemented a new responsive, mobile-first approach which increased mobile traffic by 20%.

PROJECTS

Simple projects you can check them out on my portfolio

2021 - current

Designer, Developer

- a word game in which one player has to guess a word that the other player has thought of, by guessing the letters in it.
- memory game, The cards have pictures on one side and each picture appears on two cards. The game starts with all the cards face down and players take turns to turn over two cards.
- web application helps you arrange a list of tasks you need to complete or things you want to do. Helping you not forget anything important.
- An e-commerce website is one that allows people to buy and sell physical goods, services, and digital products over the internet.
- The weather app also provides atmospheric pressure, weather conditions, visibility distance, relative humidity, and precipitation in different units.
- Chatting app allows you to communicate with your customers in web chat rooms. It enables you to send and receive messages.
- a typing game will require the player to quickly type in words - or individual letters, numbers, or other keys - that display on the screen to proceed in the game, functioning as both a challenge and a means to improve one's skill at touch typing.
